Education

Indian Institute of Information Technology, Allahabad

July 2019 – June 2023

Bachelor of Technology in Information Technology: CGPA: 8.29

Prayagraj, India

Experience

Oracle (Oracle Cloud Infrastructure)

July 2023 – Present

Member of Technical Staff (IC2)

Bengaluru, IN

- Developed a scalable Java-based user sync service on Kubernetes to automate RBAC across Grafana and APEX by integrating with OCI Identity, enabling concurrent syncing for 50+ teams and 5000+ mappings every 5 minutes with SOLID-compliant design, structured logging, and fault-tolerant REST operations.
- Built a high-throughput ETL engine in Golang to process ~50 MB/s of monitoring data from OCI Streaming to OCI Monitoring with batched ingestion and < 5% transformation overhead, supporting near real-time observability for 30+ services.
- Orchestrated the infrastructure for a centralized Monitoring & Observability stack (Grafana, Prometheus, Thanos, Loki) on Oracle EES, ensuring high availability and adoption by 200+ services across the organization.
- Developed and deployed a Python-based automation tool on OCI Functions (Fn Project) to templatzize and streamline Jira Change Request creation, onboarding 600+ users across 50+ teams and reducing manual effort by 90%.
- Built a serverless OCI Function to automate SLO/SLI alarm provisioning for OCI Monitoring and Prometheus Alertmanager, supporting 30+ teams with templated configurations and safe file-based updates using locking and synchronization.
- Implemented Jenkins CI/CD pipelines to automate the build, containerization, and deployment of applications to Oracle Kubernetes Engine (OKE), ensuring faster release cycles and consistent deployments.

Dunzo

January 2023 – June 2023

Software Engineer Intern

Bengaluru, IN

- Contributed to the Offer microservice and implemented the Offer Nudge (Snackbar) feature, driving a Rs 15 increase in Average Order Value (AOV) through contextual discount prompts.
- Improved unit test coverage of the Offer microservice to 90% to enhance reliability, maintainability, and regression safety.

Oracle (Oracle Cloud Infrastructure)

May 2022 – July 2022

Project Intern

Bengaluru, IN

- Implemented distributed tracing for OCI IDCS microservice on Kubernetes (OKE) using Jaeger and Helm; benchmarked Cassandra vs. Elasticsearch storage backends by analyzing latency and index size across 1%, 3%, and 10% sampling rates to optimize observability and system performance.

Projects

Caliiita | github.com/caliiita

- Authored the frontend of Caliiita, an event scheduling native android application written in Java, which keeps track of all the events happening in the college and gives timely reminders.
- The application has 500+ active users and is actively being used by all the Technical, Cultural and the Sports societies of IIIT Allahabad for event scheduling and management.

Technical Skills

Languages: C++, Java, Golang, Python

Frameworks & DBs: Django, MySQL, PostgreSQL

Tools: Docker, Kubernetes, Grafana, Loki, Prometheus, Thanos, Git, Terraform, Jenkins
