Education

Indian Institute of Information Technology, Allahabad

July 2019 – June 2023

Bachelor of Technology in Information Technology: CGPA: 8.29

Prayagraj, India

Experience

Oracle (Oracle Cloud Infrastructure)

July 2023 – Present

Member of Technical Staff (IC2)

Bengaluru, IN

- Owned end-to-end design, development, and deployment of a scalable Java-based user sync service on Kubernetes, automating RBAC across 5+ services and supporting 100+ teams and 10,000+ users with fault-tolerant REST operations.
- Engineered and deployed a serverless Python-based automation tool to standardize Jira Change Request workflows, onboarding 5,000+ users across 70+ teams and reducing manual effort by 95%.
- Designed and built a serverless service to automate bulk SLO/SLI alarm provisioning with config-driven templates, concurrency-safe updates, and automated rollback, scaling to 120+ teams.
- Developed a high-throughput ETL engine in Golang to process 50+ MB/s of streaming telemetry data with batched ingestion and < 5% transformation overhead, enabling near real-time observability for 30+ services.
- Orchestrated infrastructure for a centralized Monitoring & Observability stack (Grafana, Prometheus, Thanos, Loki), ensuring high availability and adoption by 200+ services across the organization.
- Implemented CI/CD pipelines to automate build, containerization, and deployment of applications to Kubernetes, accelerating release cycles and ensuring consistent, reliable deployments.

Dunzo

January 2023 – June 2023

Software Engineer Intern

Bengaluru, IN

- Contributed to the Offer microservice and implemented the Offer Nudge (Snackbar) feature, driving a Rs 15 increase in Average Order Value (AOV) through contextual discount prompts.
- Improved unit test coverage of the Offer microservice to 90% to enhance reliability, maintainability, and regression safety.

Oracle (Oracle Cloud Infrastructure)

May 2022 – July 2022

Project Intern

Bengaluru, IN

- Implemented distributed tracing for OCI IDCS microservice on Kubernetes (OKE) using Jaeger and Helm; benchmarked Cassandra vs. Elasticsearch storage backends by analyzing latency and index size across 1%, 3%, and 10% sampling rates to optimize observability and system performance.

Projects

Caliita | github.com/caliita

- Authored the frontend of Caliita, an event scheduling native android application written in Java, which keeps track of all the events happening in the college and gives timely reminders.
- The application has 500+ active users and is actively being used by all the Technical, Cultural and the Sports societies of IIIT Allahabad for event scheduling and management.

Technical Skills

Languages: C++, Java, Golang, Python

Frameworks & Databases: Django, MySQL, PostgreSQL

Cloud & DevOps: Git, Docker, Kubernetes, Terraform, CI/CD

Blogs

Sending Push Notifications using Firebase Cloud Messaging

medium/sending-push-notifications

- 270K+ views & 650+ claps till date

Extracurricular

- President of the Students' Gymkhana of IIIT Allahabad, organised the annual Cultural, Sports & Technical fests with an overall footfall of 20K+ in the tenure.
- Coordinator of the App Development wing of the Technical society of IIIT Allahabad, organised Geektoberfest 2020, the annual Hacktoberfest inspired open source event for 600+ freshers.
